1 Inception date 9/30/2000. On August 2, 2016, the U.S. Treasury Money Fund replaced the Summit Cash Reserves Fund. Performance prior to August 2, 2016, is based on the previously applied allocations of the underlying funds.

2 During the quarter ended September 30, 2016, T. Rowe Price Charitable adopted the policy of converting its investment in an underlying fund in each investment pool to I Class shares of the same fund when the I Class shares are available. The first conversion to available I Class shares occurred on July 26, 2016. Please note that for the first conversion, the I Class shares inception prior to the conversion date. The performance figures for each pool have incorporated the performance data of the underlying I Class funds. The performance figures for each underlying I Class fund have been calculated using the performance data of the prior share class up to the inception date of the I Class and the actual performance results of the I Class since its inception date. Because the I Class of an underlying fund is expected to have lower expenses than the prior share class of the same fund, the performance figures for the periods spanning before the I Class inception date would have been higher had such I Class existed over such periods.
